AMERICAN PSYCHIATRIC ASSOCIATION CONTINUING MEDICAL EDUCATION POLICY ON FULL DISCLOSURE

The American Psychiatric Association requires disclosure, by presenters at CME activities, of any significant financial or other affiliation with commercial organization(s) that may have a direct or indirect interest in the subject matter of the scientific program. A "financial interest" may include, but is not limited to, being a shareholder in the organization; being on retainer with the organization; or having research or honoraria paid by the organization. An "affiliation" may include holding a position on an advisory committee or some other role or benefit to a supporting organization.

Under the ACCME Standards for Commercial Support the existence of such relationships may constitute a conflict of interest; and the prospective audience must be informed of the presenter's affiliation with every commercial supporter by an acknowledgement in the printed program and verbal or visual disclosure to participants at the session (disclosure by slide or overhead is required if audiovisual equipment is used for the presentation). This policy is intended to openly identify any potential conflict(s) so that members of the audience in an educational activity are able to form their own judgments about the presentation. The APA also requires verbal disclosure of discussion of unlabeled uses of a commercial product or investigational use of a product not yet approved for this purpose.

The presenters on the following pages have indicated that either they or an immediate family member has a significant interest or other affiliation with a commercial supporter of this meeting and/or with the manufacturer(s) of a commercial product(s) and/or provider of commercial services(s). The presenter's name and the company's name are listed. The nature of the presenter's relationship with the disclosed company is indicated by the following: stock/other financial options, consultant, grant/research support, full-time employee, speaker's bureau, other financial interest or business relationships (specify). A full disclosure index of companies has been provided as a tool to indicate the abbreviated name and full name of the company.

The second group of presenters, beginning on page XLVII, have indicated neither they nor an immediate family member has any significant relationship to disclose. Voting members of the Board of Trustees, Assembly officers, and members of the Scientific Program Committee cannot receive honoraria or travel reimbursement for participating in Industry-Supported Symposia.
